Bug catch Up By Automation raised Manually

📌 **BUG 02 – “View by document group” dropdown does not update UI**

Bug ID: BUG_02
Module: Dashboard
Severity: Medium
Priority: Medium

Description

When the user selects different options from the **“View by document group”** dropdown on the Dashboard, the UI does not update according to the selected document group. The document list remains unchanged even after switching the dropdown values.

Steps to Reproduce

1. Login to the application
2. Navigate to the **Dashboard**
3. Locate the **View by document group** dropdown on the right side
4. Select different options such as:
    - Uploaded Documents
    - Shared with me
    - Shared with others
    - Missing Documents
    - Todos

Expected Result

• The document list should refresh based on the selected document group
• UI should dynamically update to display relevant documents for the selected option

Actual Result

• UI does not change after selecting different dropdown options
• The same document list is displayed regardless of the selected document group

📌 **BUG 03 – Missing Navigation Option on "No Matching Documents Found" Page Leads to Session Expiry**

Bug ID: BUG_03
Module: Dashboard / Search
Severity: High
Priority: High

Description

When a user searches for a non-existing document, the application redirects to a **"No Matching Documents Found"** page. This page does not provide any navigation option (such as a **Back** or **Return to Dashboard** button). Additionally, using the browser's back button results in a **Session Expired** error, preventing the user from returning to the Dashboard smoothly.

Steps to Reproduce

1. Login to the application
2. Navigate to the **Dashboard**
3. Enter a non-existing or invalid keyword in the search field
4. Submit the search

Expected Result

• User should see a "No Matching Documents Found" message
• A **Back to Dashboard** or **Clear Search** button should be available
• Browser back navigation should return the user to the Dashboard without session issues

Actual Result

• "No Matching Documents Found" page has no navigation option
• No way to return to the Dashboard from the page
• Clicking the browser back button shows **Session Expired** error

Impact

• Poor user experience
• User gets stuck on an error state
• Session expiry may cause data loss and unnecessary re-login
